

# PIZZA PAPER

\$NNPP: No, NO! Pineapple Pizza

Wow such Pizza

## INTRO

Back from the beginning of time humanity has focused on important questions: Why do we exist? What is the purpose of our life? Are we alone in the universe?

Unable to come up with answers to these interrogatives, we continued to live our lives in the simpler of ways, focusing on surviving and helping the community around us as much as we could, while enjoying life as much as we were able to. Thus, **Pizza** came about.

Much Pizza

## CREATIVITY

Out of luck, one of the best terrestrial experiences was born. We were able to find a complete plate, customisable with whatever ingredient was on site.

## EXTREME

Given this much choice, human beings degeneration became the norm: Pineapples on top.

It is about time power is given back to pizza chefs around the world and sanity is restored. The only way to bring reality back is to unite us all in spreading the verb: **No, NO! Pineapple Pizza.**

## DECENTRALIZATION AND TOKEN

\$NNPP is THE cryptocurrency that aims at discouraging pineapple pizza all across the world. \$NNPP will start as a Binance Token, with subsequent plans to land on the Ethereum blockchain.

Of the 1,000,000,000,000,000 NNPP coins in circulation at the beginning of time, 40% have been deposited in PancakeSwap for market liquidity purposes. 40% of tokens were burned and 5% - together with future Swap proceeding - are within the marketing fund, to be used according to the roadmap to fund non-pineapple pizza related projects, including advertisement for the project and code support. 5% were used to form the initial price pool; you can **win millions of \$NNPP** with every transaction!

If you want to get involved and support the project feel free to join us and support us through our **Pizza** journey, everyone is well accepted.

## GIVING BACK TO THE COMMUNITY

Supporting the project doesn't just stop to getting involved in \$NNPP. We can all in fact support the project even without having any cryptocurrency: **Just buy a non-pineapple pizza!**

In order to do that, \$NNPP is randomly giving back crypto to the users. For every transaction, you have the opportunity to **win an extra amount of \$NNPP** taken directly from the prize pool fund account. Help yourself with buying a real Pizza!

## CONCLUSIONS

The No, NO! Pineapple Pizza is the only way to bring change from the digital world to reality. Join us and become a **real** pizza fan!
